# Region of first recurrence as locoregional cancer

## Identifying and definitional attributes

Metadata item type: Property
METEOR identifier: 393844

**Registration status:** <u>Health</u>, Standard 07/12/2011

**Definition:** The anatomical site of first recurrence as locoregional cancer.

The term recurrence defines the return, reappearance or metastasis of cancer (of

the same histology) after a disease free period.

Locoregional recurrence refers to the recurrence of cancer cells at the same site as the original (primary) tumour or the regional lymph nodes after a disease free

period.

Property group: <u>Assessment event</u>
