# Patient—cancer status, code N

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Cancer status
<b>METEOR identifier:</b>	394071
<b>Registration status:</b>	<a href="#">Health</a> , Standard 07/12/2011
<b>Definition:</b>	The absence or presence of clinical evidence of cancer in the patient, as represented by a code.
<b>Data Element Concept:</b>	<a href="#">Patient—cancer status</a>
<b>Value Domain:</b>	<a href="#">Cancer status code N</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Code
<b>Data type:</b>	Number
<b>Format:</b>	N
<b>Maximum character length:</b>	1

	Value	Meaning
<b>Permissible values:</b>	1	No evidence of cancer
	2	Evidence of cancer
<b>Supplementary values:</b>	8	Unknown whether there is evidence of cancer
	9	Not stated/inadequately described

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	Record whether or not there is clinical evidence of cancer in the patient at the date of last contact or death.
	Cancer status changes if the patient has a recurrence or relapse and the record should be updated.
	The patient's cancer status should be changed only if new information is received from an official source. If information is obtained from the patient, a family member or other non-physician, then cancer status is not updated.
	If the patient has multiple primary cancers, each primary should have the appropriate cancer status recorded.
	For patients with hematopoietic disease who are in remission, code as 1-no evidence of this cancer.
<b>Collection methods:</b>	This information should be collected from the patient's medical record.
<b>Comments:</b>	This information is used for patient follow-up and outcome studies.
