National Healthcare Agreement: P10-Breast cancer screening rates, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	Breast cancer screening rates, 2010
METEOR identifier:	394267
Registration status:	Health , Superseded 08/06/2011
Description:	Screening rates for breast cancer for women within the national target age group.
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Prevention Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: P10-Breast cancer screening rates, 2010 QS Health , Superseded 08/06/2011

Collection and usage attributes

Population group age from:	Women aged 50 years
Population group age to:	Women aged 69 years
Computation description:	Rates are directly age-standardised to the Australian population as at 30 June 2001, expressed 100 people.
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Number of women aged 50-69 years who have been screened for breast cancer in a 2 year period.
Numerator data elements:

Guide for use

Data source type: Administrative by-product data

Denominator:

Total number of women aged 50–69 years

Calculation: The average of the ABS estimated resident populations (females aged 50–69 years) for each of the years in the 2 year screening period.

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Institute of Health and Welfare

Further data development / collection required: Specification: Long-term
The quality of Indigenous identification needs to be assessed.

Other issues caveats: Remoteness area and SEIFA of residence are based on residential address at the time of screening.

Disaggregation by Indigenous status, remoteness area and SEIFA of residence within individual states/territories is subject to data quality considerations.

Recommendations from the current Evaluation of BreastScreen Australia may result in changes to how participation is reported in the future as well as identifying any data development required.
