## Accountability attributes

**Reporting requirements:** National Healthcare Agreement  
**Organisation responsible for providing data:** Australian Institute of Health and Welfare

**Further data development /  
collection required:**

Specification: Interim

A National Bowel Cancer Dataset (i.e. data dictionary) is under development.

The quality of Indigenous identification needs to be assessed.

Explore how to identify people who are screened outside the National Bowel Cancer Screening Program.

**Other issues caveats:**

Indigenous status is self-reported by participating individuals.

Remoteness area and SEIFA of residence are based on postcode of residential address at the time of screening.

Lack of inclusion of people screened outside the National Bowel Cancer Screening Program will result in an underestimate of the population screening rates in the target age groups.

Disaggregation by Indigenous status, remoteness area and SEIFA of residence within individual states/territories is subject to data quality considerations.

The bowel cancer screening program is guaranteed until 2010. The program is expected to expand to more age groups on a rolling basis.

The National Bowel Cancer Screening Program was suspended in May 2009 due to unreliable screening kits, subsequently resuming in November 2009.
