Cancer treatment—systemic therapy procedure date

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	394641
Registration status:	Health, Superseded 08/05/2014
Definition:	The date on which **systemic therapy procedure** was administered during the initial course of treatment for cancer.

Object Class attributes

Identifying and definitional attributes

Object class:	Cancer treatment
Definition:	The course of cancer directed treatment or treatments, with defined dates of commencement and cessation, given to the patient by a treatment provider or team of providers. It includes all treatments administered to the patient before disease progression or recurrence and applies to surgical treatment, radiation therapy and systemic agent therapy for cancer.
Context:	This metadata item is required to provide the basis for a standard approach to recording and monitoring patterns of initial treatment for cancer patients.
Specialisation of:	Service/care event

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
Origin:	Commission on Cancer, Standards of the Commission on Cancer Registry Operations and Data Standards (ROADS) Volume II (1998) Commission on Cancer, Facility Oncology Registry Data Standards (2002)

Property attributes

Identifying and definitional attributes

Property:	Systemic therapy procedure date
Definition:	The date on which a systemic therapy procedure was performed. A systemic therapy procedure is a medical, surgical or radiation procedure that has an effect on the hormonal or immunologic balance of the patient, and refers to haematologic transplant and endocrine procedures. Haematologic transplants are bone marrow or stem cell transplants performed to protect patients from myelosuppression or bone marrow ablation associated with the administration of high-dose chemotherapy or radiotherapy. Endocrine therapy is cancer therapy that achieves its antitumour effect through the use of radiation or surgical procedures that suppress the naturally occurring hormonal activity of the patient (when the cancer occurs at another site) and, therefore, alter or affect the long-term control of the cancer's growth.
Property group:	Service provision event
