National Healthcare Agreement: P28-Public sector community mental health services, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	Public sector community mental health services, 2010
METEOR identifier:	394946
Registration status:	Health , Superseded 08/06/2011
Description:	Public community mental health service utilisation.
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Primary and Community Health Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: P28-Public sector community mental health services, 2010 QS Health , Superseded 08/06/2011

Collection and usage attributes

Computation description:	Presented per 1,000 population. Rates are directly age-standardised to the Australian population as at 30 June 2001.								
Computation:	$1,000 \times (\text{Numerator} \div \text{Denominator})$								
Numerator:	Total number of community mental health service contacts provided by public sector community mental health services								
Numerator data elements:	<table border="1"><tr><td>Data Element / Data Set</td></tr><tr><td>Person—person identifier, XXXXXX[X(14)]</td></tr><tr><td>Data Source</td></tr><tr><td>Community mental health care National Minimum Data Set (CMHC NMDS)</td></tr><tr><td>NMDS / DSS</td></tr><tr><td>Community mental health care NMDS 2007-08</td></tr><tr><td>Guide for use</td></tr><tr><td>Data source type: Administrative by-product data</td></tr></table>	Data Element / Data Set	Person—person identifier, XXXXXX[X(14)]	Data Source	Community mental health care National Minimum Data Set (CMHC NMDS)	NMDS / DSS	Community mental health care NMDS 2007-08	Guide for use	Data source type: Administrative by-product data

NMDS / DSS

[Community mental health care NMDS 2007-08](#)

Guide for use

Used to determine age at contact date

Data source type: Administrative by-product data

Data Element / Data Set

[Person—area of usual residence, geographical location code \(ASGC 2006\)
NNNNN](#)

Data Source

[Community mental health care National Minimum Data Set \(CMHC NMDS\)](#)

NMDS / DSS

[Community mental health care NMDS 2007-08](#)

Guide for use

Data source type: Administrative by-product data

Used for disaggregation by remoteness area and SEIFA of residence

Comments: Specified disaggregation: Nationally and by state/territory (location of service): by sex, 10 year age group, Indigenous status, remoteness area and SEIFA of residence.

Available disaggregation: Nationally and by state/territory (location of service): by sex, 10 year age group, Indigenous status, remoteness area and SEIFA of residence.

Data for 2008-09 will be available by June 2010.

Most recent data available for 2010 CRC baseline report: 2007-08

Representational attributes

Representation class: Rate
Data type: Real
Unit of measure: Person
Format: NN[N]

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Institute of Health and Welfare

Further data development / collection required: Specification: Long-term

Ability to identify mental health service treatment occasions. In keeping with the specifications of the CMHC NMDS, a number of jurisdictions only supply data on patients being treated to the CMHC NMDS. Other jurisdictions supply contacts data that encompass encounters that do not amount to treatment.

The Mental Health Information Strategy Sub-committee (MHISS) proposes to start work to amend the data definitions in the CMHC NMDS to allow the identification of people who are assessed but not treated. That work will still not necessarily capture all service contacts recorded by community mental health services.

Data development activity is required to enable more timely provision of data in order to meet the identified reporting requirements.

Indigenous identification needs improvement.

Other issues caveats: Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication.

There is some variability in the collection of data across jurisdictions affecting comparability.
