Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Institute of Health and Welfare

Further data development / collection required: Specification: Interim

All relevant Medical Benefits Scheme (MBS) mental health items should be included as an interim measure. In the longer term, look at better balance of GP activity on mental health, information about activity beyond the specified health professions and improve Indigenous identification in MBS data. This includes the development of an adjustment factor for MBS data using data from a currently available sample.

Not all private mental health services are covered by the MBS, including those provided in support of accident or crime compensation cases and DVA-funded cases. Further development of this indicator should attempt to cover the gap of non-MBS items through investigation of the possibility of using private health insurance data.

Other issues caveats: Major service streams are private psychiatrists, general practitioners, clinical psychologists and other allied health providers (including registered psychologists, occupational therapists and social workers).

MBS item numbers change over time and need to be updated as required.

Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication.

Department of Veteran's Affairs (DVA) has been identified as a data source, however due to lack of data availability it has not been included in the calculation this reporting cycle. Inclusion in future reporting depends advice from DVA.
