National Healthcare Agreement: P31-Proportion of people with asthma with a written asthma plan, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Common name:	Proportion of people with asthma with a written asthma plan, 2010
Short name:	People with a written asthma plan, 2010
METEOR identifier:	394978
Registration status:	Health , Superseded 08/06/2011
Description:	Proportion of people with asthma who have a written asthma plan
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Primary and Community Health Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: P31-Proportion of people with asthma with a written asthma plan, 2010 QS Health , Retired 12/03/2015

Collection and usage attributes

Computation description:	Rates are directly age-standardised to the Australian population as at 30 June 2001.
Computation:	100 x (Numerator ÷ Denominator)
Numerator:	People with asthma who have a written asthma plan

Numerator data elements:

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data:	Australian Bureau of Statistics
Further data development / collection required:	<p>Specification: Interim</p> <p>Mechanisms for reporting annually in between surveys are being explored. There is scope for improved capacity in jurisdictions depending on the implementation plan for the National Partnership Agreement on Preventive Health.</p> <p>Further data development is required to accurately estimate the prevalence of asthma. Ideally this indicator would be related to the number of people with moderate to severe asthma, but this number is not known with any degree of accuracy.</p>
Other issues caveats:	<p>Disaggregations within individual jurisdictions are subject to data quality considerations.</p> <p>The scope of collections is limited to persons usually resident in private dwellings. Persons usually resident in non-private dwellings such as hotels, motels, hospitals, nursing homes and short-stay caravan parks were not included in the surveys. Estimates for non-Indigenous people estimates exclude those living in very remote areas of Australia.</p>
