National Healthcare Agreement: P33-Women with at least one antenatal visit in the first trimester, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	One antenatal visit in the first trimester, 2010
METEOR identifier:	395008
Registration status:	Health , Superseded 08/06/2011
Description:	<p>Proportion of pregnancies that resulted in a birth with an antenatal visit in the first trimester.</p> <p>Births include live and still births where the birth weight was at least 400 grams or the gestational age was 20 weeks or more.</p>
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Primary and Community Health Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: P33-Women with at least one antenatal visit in the first trimester of pregnancy, 2010 QS Health , Superseded 08/06/2011

Collection and usage attributes

Computation description:	Population is women who have given birth in 2007. Excludes women with unknown gestation at first antenatal visit.
Computation:	100 x (Numerator ÷ Denominator)
Numerator:	Number of women who gave birth in 2007 with the first antenatal in the first trimester of pregnancy. 'First trimester' is defined as the first 13 weeks of pregnancy.
Numerator data elements:	<div>Data Element / Data Set Gestational age in completed weeks at first antenatal visit Data Source AIHW National Perinatal Data Collection (NPDC) NMDS / DSS Perinatal NMDS 2007-2008 Guide for use Data source type: Administrative by-product data 'First antenatal' visit in the first trimester is defined as gestational age in weeks of 13 or less</div>
Denominator:	Number of women who gave birth in 2007 with a known gestation at first antenatal visit.

Denominator data elements:

Data Element / Data Set

Gestational age in completed weeks at first antenatal visit

Data Source

[AIHW National Perinatal Data Collection \(NPDC\)](#)

NMDS / DSS

[Perinatal NMDS 2007-2008](#)

Guide for use

Data source type: Administrative by-product data
'Known gestation at first antenatal visit' is defined as any valid non-missing gestational age

Disaggregation data elements:

NMDS / DSS

[Perinatal NMDS 2007-2008](#)

Guide for use

Data source type: Administrative by-product data
Used for disaggregation by state/territory, remoteness area and SEIFA of residence.

Comments:

Specified disaggregation: Nationally and by state/territory of usual residence: by maternal Indigenous status, remoteness area and SEIFA of residence.

Available disaggregation: Nationally and by state/territory of usual residence: by maternal Indigenous status, remoteness area and SEIFA of residence.

Data for 2008-09 will be available in February 2010.

Most recent data available for 2010 CRC baseline report: 2007.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Format: NN.N

Indicator conceptual framework

Framework and dimensions: [Accessibility](#)

Frequency

Calendar years ending 31 December each year

Data custodian

Australian Institute of Health and Welfare

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Institute of Health and Welfare

Further data development / collection required: Specification: Interim

Work is currently under way to develop a standard definition for gestation at first presentation for antenatal care.

Agreed definition of first antenatal visit and implementation into NMDS and associated collections needed.

Work is also required to improve Indigenous identification.

Investigation is required to investigate mechanisms for obtaining data from the private sector.

Other issues caveats: Data for this indicator are available for three jurisdictions for 2010 reporting (NSW, SA and NT). Comparability between data currently collected may be limited by different definitions of first antenatal visit.

Disaggregations are subject to data quality considerations. Some disaggregations may result in numbers too small for publication.

Data for all jurisdictions will not be available until the 2010 reference year, at the earliest. Data on gestation at first antenatal visit has been collected by NSW since Jan 2006 and South Australia since Jan 2007. Victoria commenced collecting the information in January 2009, and Queensland in July 2009.
