National Healthcare Agreement: P45-Rates of services: Overnight separations, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	Rates of services: Overnight separations, 2010
METEOR identifier:	395088
Registration status:	Health , Superseded 08/06/2011
Description:	Number of overnight hospital separations per 1,000 population.
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Hospital and Related Care Health , Standard 07/07/2010 National Health Performance Authority (retired) , Retired 01/07/2016
Data quality statement:	National Healthcare Agreement: P45-Rates of services: Overnight separations, 2010 QS Health , Superseded 08/06/2011

Collection and usage attributes

Computation description:	Excludes newborns without qualified days. Rates are directly age-standardised to the Australian population as at 30 June 2001. <u>Overnight separation</u> : Length of stay in hospital was at least one night (admission date and separation date are different). Presented per 1,000 population.
Computation:	$1,000 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Number of overnight separations

Numerator data elements:

Data Element / Data Set

NMDS / DSS

[Admitted patient care NMDS 2007-08](#)

Guide for use

Data source type: Administrative by-product data
Used for disaggregation by remoteness area and SEIFA of residence

Comments: Specified disaggregation: Nationally and by state/territory (of hospital location): by Indigenous status, remoteness area and SEIFA of residence, and public/private hospital type.

Available disaggregation: Nationally and by state/territory (of hospital location): by Indigenous status, remoteness area and SEIFA of residence, and public/private hospital type.

Most recent data available for 2010 CRC baseline report: 2007-08.

Representational attributes

Representation class: Rate
Data type: Real
Unit of measure: Person
Format: NN[N].N

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Institute of Health and Welfare

Further data development / collection required: Specification: Long-term

Work is required to improve the identification of Indigenous Australians within this data.

Other issues caveats:

Excludes private hospitals for Tasmania, the ACT and NT.

Disaggregation by Indigenous status, remoteness area and SEIFA of residence within individual states/territories is subject to data quality considerations.

Some disaggregations could result in numbers too small for publication.

The number of overnight separations is considered to be more comparable than the total number of separations, among jurisdictions and between the public and private sectors. This is because there is variation in admission practices and policies which lead to variation in the number of same-day admissions among providers and over time.

Interpretation of rates for jurisdictions should take into consideration cross-border flows.

The quality of data on Indigenous status is not considered to be adequate for analysis purposes for the ACT and Tasmania.
