National Healthcare Agreement: P60-Access to services by type of service compared to need, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Access to services compared to need, 2010
METEOR identifier:	395101
Registration status:	Health , Superseded 08/06/2011
Description:	Proportion of people who accessed health services by health status.
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Social Inclusion and Indigenous Health Health , Standard 07/07/2010 Indigenous , Standard 11/09/2012
Data quality statement:	National Healthcare Agreement: P60-Access to services by type of service compared to need, 2010 QS Health , Retired 12/03/2015

Collection and usage attributes

Population group age from:	15 years of age, except those who visited dentists or dental professional: from 2 years of age							
Computation description:	Rates are directly age-standardised to the Australian population as at 30 June 2001. Limited to people aged 15 years or over. The service types to be reported are Admitted hospitalisations; Casualty/outpatients; General Practitioner (GP) and/or specialist doctor consultations; Consultations with other health professional; and Dental consultation. Categories of self-assessed health status are Excellent; Very good; Good; Fair; and Poor. These should be combined into two categories for reporting: Excellent/very good/good; and Fair/poor. For the service type 'Admitted hospitalisations', access is recorded based on the last 12 months. For all other services, access is recorded based on the last 2 weeks.							
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$ Calculated separately for each type of service and by categories of self-assessed health status.							
Numerator:	Number of people aged 15 years and over who accessed a particular health services in the past 12 months (for hospital admissions) or 2 weeks (for other health services)							
Numerator data elements:	<table border="1"><tr><td>Data Element / Data Set</td></tr><tr><td>Persons admitted to hospital in the last 12 months</td></tr><tr><td>Data Source</td></tr><tr><td>ABS 2004-05 National Health Survey (NHS)</td></tr><tr><td>Guide for use</td></tr><tr><td>Data source type: Survey</td></tr><tr><td>Data element categories: Hospitalised in the last 12 months, not hospitalised</td></tr></table>	Data Element / Data Set	Persons admitted to hospital in the last 12 months	Data Source	ABS 2004-05 National Health Survey (NHS)	Guide for use	Data source type: Survey	Data element categories: Hospitalised in the last 12 months, not hospitalised

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Bureau of Statistics

Further data development / collection required: Specification: Interim

From 2010–11, this indicator may be derived from the Australian Bureau of Statistics (ABS) Patient Experience Survey. Service types in scope for 2011 CRC reporting are GPs, specialists, hospital emergency and hospital admissions; access to dentists will be available for 2012 reporting and beyond.

In the immediate future years the NATSIHS will remain the best data source for Indigenous Australians, as disaggregation of the Patient Experience Survey by Indigenous status within states/territories is unlikely to be possible. As the NATSIHS is conducted every 6 years, mechanisms for more frequent reporting of this indicator by Indigenous status should be investigated.

Modelling of imputed need for health services among population groups could be considered to enhance usefulness of administrative data on differential access to health services.

Other issues caveats: Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication.

The scope of the source collections is limited to persons usually resident in private dwellings. Persons usually resident in non-private dwellings such as hotels, motels, hospitals, nursing homes and short-stay caravan parks were not included in the surveys. Estimates for non-Indigenous people exclude those living in very remote areas of Australia.
