National Healthcare Agreement: P62-Hospitalisation for injury and poisoning, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Hospitalisation for injury and poisoning, 2010
METEOR identifier:	395105
Registration status:	Health , Superseded 08/06/2011
Description:	The number of hospital separations with a principal diagnosis of injury and poisoning.
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Social Inclusion and Indigenous Health Health , Standard 07/07/2010 Indigenous , Standard 11/09/2012
Data quality statement:	National Healthcare Agreement: P62-Hospitalisation for injury and poisoning, 2010 QS Health , Superseded 08/06/2011

Collection and usage attributes

Computation description:	Rates are directly age-standardised to the Australian population as at 30 June 2001. Injury and poisoning diagnoses are defined by ICD-10-AM codes S00-T98.
Computation:	$1,000 \times (\text{Numerator} \div \text{Denominator})$ Presented per 1,000 population.
Numerator:	Number of separations with a principal diagnosis of injury and poisoning

Numerator data elements:

Data Element / Data Set

[Episode of care—principal diagnosis, code \(ICD-10-AM 7th edn\) ANN{.N\[N\]}](#)

Data Source

[Admitted Patient Care National Minimum Data Set \(APC NMDS\)](#)

NMDS / DSS

[Admitted patient care NMDS 2007-08](#)

Guide for use

Data source type: Administrative by-product data

Data Element / Data Set

[Injury event—external cause, code \(ICD-10-AM 7th edn\) ANN{.N\[N\]}](#)

[Admitted Patient Care National Minimum Data Set \(APC NMDS\)](#)

NMDS / DSS

[Admitted patient care NMDS 2007-08](#)

Guide for use

Data source type: Administrative by-product data
Used for disaggregation by remoteness area and SEIFA of residence

Comments: Specified Disaggregation: Nationally and by state/territory (of hospital location): by sex, Indigenous status, remoteness area and SEIFA of residence.

Available Disaggregation: Nationally and by state/territory (of hospital location): by sex, Indigenous status, remoteness area and SEIFA of residence.

Most recent data available for 2010 CRC baseline reporting: 2007-08.

Representational attributes

Representation class: Rate

Data type: Real

Unit of measure: Episode

Format: NN[N].N

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Australian Institute of Health and Welfare

Further data development / collection required: Improving the quality of Indigenous identification within this dataset.

Work is required to improve the identification of Indigenous Australians within this data.

Other issues caveats:

Disaggregation by Indigenous status, remoteness area and SEIFA of residence within individual states/territories is subject to data quality considerations.

Some disaggregations could result in numbers too small for publication.

The hospital separations data provide only a partial picture of the overall burden of injury as it does not include injuries that are treated by GPs and in the emergency department that do not require admission to hospital.

The number and pattern of hospitalisations can be affected by differing admission practices among the jurisdictions and from year to year, and differing levels and patterns of service delivery.

This aligns with Indicator 1.03 of *The Aboriginal and Torres Strait Islander Health Performance Framework*. Hospitalisation rates are presented in greater detail in the framework, including age-specific rates, Indigenous: other rate ratios for each State/Territory, and breakdown by type of injury and external cause.

A related indicator, *Hospitalisation rates by principal diagnosis*, exists in the National Indigenous Reform Agreement (NIRA). While the specifications for the NIRA indicator have not been endorsed (as at 20 July 2009) the specifications for NHA indicator P62 are mappable to the draft NIRA indicator.

Interpretation of rates for jurisdictions should take cross-border flows into consideration.

The quality of data on Indigenous status is not considered to be adequate for analysis purposes for the ACT and Tasmania.
