Collection and usage attributes

Guide for use:

Guide for use - Order file

For the purposes of the Juvenile Justice NMDS, this unique identifier is retained across collection periods.

The identifier is assigned by the State or Territory juvenile justice department.

This Data Element is used in the Order file to uniquely identify each supervised order or legal arrangement.

In the Order file, the Episode identifier or Order identifier will in most cases be unique. However, where a single order specifies multiple types of supervision, for example a blended order that specifies a period in detention followed by a period of community-based supervision, the information relating to each type of supervision will comprise a separate record but the Order identifier will remain the same.

In the example below, order #10001 is a blended order that comprises a period in detention from 1/1/08 to 1/6/08 followed by a period in the community from 1/6/08 to 1/12/08. Order #10002 is an unrelated remand order.

Person identifier	Order identifier	Order start date	Order end date	Order type-national	Order end reason	Comment
1	10001	01/01/08	01/06/08	35 (sentenced detention)	completed	blended order part 1
1	10001	01/06/08	01/12/08	32 (sentenced community-based with additional mandated requirements)	completed	blended order part 2
1	10002	15/01/09	20/01/09	21 (remand)	completed	unrelated order

Guide for use - Order types file

This Data Element is used in the Order types file to provide a unique and jurisdictionally specific code applied to the Service episode - legal order/arrangement type, local, to identify the types of supervised orders available for young people within the jurisdiction.
