Enquiries or comments on the METEOR metadata or download should be directed to the METEOR team at meteor@aihw.gov.au.

Interpretability - Quality Statement

The availability of information to help provide insight into the data. Information available which could assist interpretation may include information about the variables used, the availability of metadata, including concepts and classifications.

Interpretability is an important component of quality as it enables the information to be understood and utilised appropriately. Information on interpretability would point users towards other documentation to help understand the data and also illuminate any key variables which are difficult to interpret. Aspects of interpretability which should be addressed, where relevant, include:

- how to access information about the collection, including hotlinks
- types of information available in publications and reports, including hotlinks
