

Geographic remoteness

Identifying and definitional attributes

Metadata item type:	Property
METEOR identifier:	396537
Registration status:	<ul style="list-style-type: none">• Commonwealth Department of Health, Standard 17/12/2015• Community Services (retired), Standard 10/04/2013• Disability, Standard 13/08/2015• Health, Superseded 06/09/2018• Housing assistance, Standard 01/05/2013
Definition:	The remoteness of a location, based on the physical road distance to the nearest urban centre and its population size.
Context:	Geographic remoteness is essentially a measure of a physical location's level of access to goods and services. Large population centres tend to have a greater range of goods and services available than small centres. Typically, a population centre is not likely to provide a full range of goods and services until its population reaches around 250,000 people.
Property group:	Location characteristics
