Name - Outcome Area

The following information is only applicable to outcome areas.

Definition

An outcome area is a statistical measure used to describe the progress or performance of the health or welfare system. This may be linked to a population or a number related to the provision of goods and services-output.

Obligation

Mandatory completion.

Development rules

- A. An outcome area name is composed solely of the formal name specified by the responsible auspice body. For example: Prevention; Prevention: Children are born and remain healthy; Primary and community health; Sustainability; and Social inclusion and Indigenous health.
- B. State the full and formal name of the outcome area, as specified by the auspice body responsible for defining the indicators, for example 'Prevention', or 'Primary and community health'.
- C. A capital letter may be used for the first letter of the first word and proper nouns. Wherein the name is separated by a colon such as in 'Prevention: Children are born and remain healthy', the first word in the second portion may also start with a capital letter.
- D. Commas are not permitted unless they are a part of the formal Outcome area name as specified by the responsible auspice body.
- E. Emdashes are not permitted unless they are a part of the formal Outcome area name as specified by the responsible auspice body.
- F. Colons are not permitted unless they are a part of the formal Outcome area name as specified by the responsible auspice body.
- G. Full stops are not permitted unless they are a part of the formal Outcome area name as specified by the responsible auspice body.
- H. Parentheses are not permitted unless they are a part of the formal Outcome area name as specified by the responsible auspice body.
- I. Square and curly brackets (braces) are not permitted unless they are a part of the formal Outcome area name as specified by the responsible auspice body.
