Implementation in Data Set Specifications:

[Chronic condition cluster](#)

[Health](#), Superseded 28/04/2016

DSS specific information:

This data element is included in the Prisoner Health DSS as the National Prisoner Health Indicators includes the indicators:

- Proportion of prison entrants who report that they have been told by a doctor or nurse that they have arthritis, and who still have the condition currently;
- Proportion of prison entrants who report that they have been told by a doctor or nurse that they have asthma, and who still have the condition currently;
- Proportion of prison entrants who report that they have been told by a doctor or nurse that they have cancer, and who still have the condition currently;
- Proportion of prison entrants who report that they have been told by a doctor or nurse that they have cardiovascular disease, and who still have the condition currently; and
- Proportion of prison entrants who report that they have been told by a doctor or nurse that they have diabetes, and who still have the condition currently.

This data element can be used in conjunction with the data elements: [Person—type of chronic condition, code N](#) and [Person—chronic condition indicator, yes/no code N](#) to obtain information on the prevalence of chronic conditions in a population group.

[Prison dischargee DSS](#)

[Health](#), Superseded 28/04/2016

DSS specific information:

Can occur once for prior to most recent imprisonment and can occur a second time for during most recent imprisonment.
