National Healthcare Agreement: P53-Older people receiving aged care services, 2010

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	Older people receiving aged care services, 2010
METEOR identifier:	400211
Registration status:	Health , Superseded 08/06/2011
Description:	Number of people aged 70 years and over, and Indigenous people aged 50 to 69 years, receiving aged care services in community settings or residential settings.
Indicator set:	National Healthcare Agreement (2010) Health , Superseded 08/06/2011
Outcome area:	Aged Care Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: P53-Older people receiving aged care services, 2010 QS Health , Superseded 08/06/2011

Collection and usage attributes

Population group age from:	70 years and over (for the total population), 50 to 69 years (for the Indigenous population)
Computation description:	Services included are: Home and Community Care (HACC), Veterans' Home Care (VHC), Community Aged Care Packages (CACP), Extended Aged Care at Home (EACH), EACH Dementia (EACH-D), residential aged care, residential respite and Transition Care.
Computation:	There are two different presentations for this indicator: Presentation 1 : Numerator only Presentation 2 : $1,000 \times (\text{Numerator} \div \text{Denominator})$ Calculated separately for each program.
Numerator:	Number of individuals using residential aged care or community-based aged care programs during the 12 months to 30 June

Numerator data elements:**Data Element / Data Set**

Number of individuals using residential aged care or community-based aged care programs during the 12 months to 30 June

Comments:

Specified disaggregation: State/territory by age group, Indigenous status, remoteness area and SEIFA of residence.
Data source type: Administrative by-product data

Available disaggregation: State/territory by age group, Indigenous status and remoteness area.

Remoteness area is based on the location of the service provider, except for the HACC program where state/territory is based on the location of the HACC agency and the remoteness category is based on the postcode of the care recipient.

Most recent data available for 2010 CRC baseline report: 2008-09.

When will 2008-09 data be available: September-November 2009.

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Department of Health and Ageing/Australian Institute of Health and Welfare

**Further data development /
collection required:** Specification: Interim

Data linkage methodology would need to be developed to estimate the number of individuals receiving aged care services across aged care programs (i.e. people can receive services across multiple programs both concurrently and sequentially).

Other issues caveats:

Disaggregations within individual jurisdictions are subject to data quality considerations.

Completeness of Indigenous status varies across data collections.

People can receive services across multiple programs both concurrently and sequentially, therefore the number of unique individuals will be less than the total number of people receiving services from each program.

Inclusion of Veterans' Home Care (VHC) data pending advice from Department of Veterans' Affairs (DVA).
