Person with cancer—extent of primary cancer, TNM stage (UICC TNM Classification of Malignant Tumours, 7th ed) code X[XX]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Cancer staging—TNM stage grouping code
METEOR identifier:	403726
Registration status:	Health , Superseded 16/01/2020
Definition:	The anatomical extent of disease in a person with cancer based on the previously coded T, N and M stage categories, as represented by a code.
Data Element Concept:	Person with cancer—extent of primary cancer
Value Domain:	TNM stage (UICC TNM Classification of Malignant Tumours, 7th ed) code X[XX]

Value domain attributes

Representational attributes

Classification scheme:	International Union against Cancer (UICC) TNM Classification of Malignant Tumours 7th edition	
Representation class:	Code	
Data type:	String	
Format:	X[XX]	
Maximum character length:	3	
Supplementary values:	Value	Meaning
	997	Not applicable
	998	Unknown
	999	Not stated/inadequately described

Collection and usage attributes

Guide for use:	Record the stage in Arabic numerals and the appropriate upper or lower case alphabetic character omitting the prefix "stage". For example, record Stage IIA2 for cancer of the cervix uteri as "2A2". Valid stage grouping codes from the current edition of the UICC TNM Classification of Malignant Tumours. Refer to the TNM Supplement: A Commentary on Uniform Use, 3rd Edition for coding rules.

Source and reference attributes

Reference documents:	Wittekind C et al (Editors) 2003. International Union Against Cancer (UICC): TNM supplement: A commentary on uniform use, 3rd edition. Wiley-Blackwell.
-----------------------------	---

Data element attributes

Collection and usage attributes

Guide for use:	<p>Record the extent of the primary cancer at the time of diagnosis of the cancer.</p> <p>TNM staging applies to solid tumours excluding brain tumours.</p> <p>The current edition of the American Joint Committee on Cancer (AJCC) Cancer Staging Manual provides an equivalent and alternative source of TNM stage grouping codes.</p> <p>Stage groupings using classification systems other than the TNM classification system are recorded separately.</p>
Collection methods:	<p>This information should be obtained from the patient's medical record.</p>
Comments:	<p>Cancer stage is an important determinant of treatment and prognosis, and is used to evaluate new treatments and analyse outcomes. Survival analysis is adjusted by stage at diagnosis and distribution of cancer cases by type and stage.</p>
