Rheumatic heart disease surgery—post-surgery survival indicator, yes/no/not stated/inadequately described code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: RHD surgery outcome

METEOR identifier: 406783

Registration status: Health, Recorded 03/02/2012

Definition: Whether a person survived 30 days after surgery for repair or replacement of heart

valve(s) during treatment of rheumatic heart disease, as represented by a code.

Data Element Concept: Rheumatic heart disease surgery—post-surgery survival indicator

Value Domain: Yes/no/not stated/inadequately described code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Boolean

Format: N

Maximum character length: 1

Value Meaning

Permissible values: 1 Yes

2 No

Supplementary values: 9 Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 9 Not stated/inadequately described

This code is not for use in primary data collections.
