Guide for use:

Generally, the complete hospital name should be used to avoid any ambiguity in identification. This should usually be the same as company registration name. However, in certain circumstances (e.g. internal use), a short name (i.e. an abbreviated name by which the hospital is known) or a locally used name (e.g. where a hospital is known by a name that is different to the company registration name) can be used. At least one hospital name must be recorded for each hospital.

The management of mental health services across a jurisdiction or area may result in a number of separate *Specialised mental health service organisations* reporting various mental health service units from a single hospital entity. In these cases, the Hospital name need not be identical across all entries for the same hospital. A *Specialised mental health service organisation* may consist of one or more clusters of service units providing services in admitted patient, residential and ambulatory settings. For example, a *Specialised mental health service organisation* may consist of several hospitals (clusters of admitted patient service units) and/or ambulatory or residential service unit clusters (for example, a cluster of child and adolescent ambulatory service units, and a cluster of aged residential service units).

To allow service units to be individually identified, but still also to be identified as part of a hospital (for the admitted patient service setting), or as part of another type of cluster (e.g. other cluster types for ambulatory or residential service setting), a separate reporting level called *Hospital* for admitted patient service units and *Service unit cluster* for ambulatory service units and residential service units is necessary.

The concept of hospital only applies to admitted service units. The equivalent entity for the grouping of ambulatory service units is cluster.

Where applicable, service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).

[National Outcomes and Casemix Collection NMDS 2023-24Health](#), Recorded 05/08/2022

Implementation start date: 01/07/2023

Implementation end date: 30/06/2024

Conditional obligation:

For use in the National Outcomes and Casemix Collection (NOCC) this Data element applies when the service provision setting is [Admitted patient mental health care service](#).

Data must be collected for either this Data element or [Establishment—service unit cluster name, text XXX\[X\(97\)\]](#)

DSS specific information:

For use in the National Outcomes and Casemix Collection (NOCC), this Data element collects the common name used to identify the service unit. For admitted patient service units, the Hospital-Cluster name should be identical to that used to identify the hospital to which the service unit belongs. For ambulatory and residential services units, where there is no service unit cluster, the Hospital - Cluster name would use the relevant organisation name.

[Your Experience of Service National Best Endeavours Data Set 2019–Health](#), Standard 15/04/2021

Conditional obligation:

To be used when reporting records of the YES survey relating to admitted service units.

DSS specific information:

This relates to the hospital name which the YES survey records for collection location identification purposes.
