Sex of prison entrants cluster

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 412252

Registration status: Health, Superseded 28/04/2016

DSS type: Data Element Cluster

Scope: These data elements are used in conjunction with each other to describe the

number of male and female prison entrants into a prison during the National

Prisoner Health Census period.

Collection and usage attributes

Guide for use: The Sex of prison entrants cluster comprises two data elements which allow data

on the number of male and female prison entrants into a prison during the National

Prisoner Health Census period to be determined.

This is achieved by the combination of the two data elements: *Establishment* (prison)—number of prison entrants, number N[NN] and Person—sex, code N.

The Sex of prison entrants cluster describes the following information:

Sex	Number of prison entrants
Male	N[NN]
Female	N[NN]

Comments: The number and sex of prisoners entering Australia's prisons during the National

Prisoner Health Census period will be used to derive statistics on the demographic

characteristics of prison entrants.
