

# Person—prisoner health discharge summary indicator

**Metadata item type:** Data Element Concept

**METEOR identifier:** 412260

**Registration status:**

- [Health](#), Standard 25/08/2011

**Definition:** An indicator of whether a [prisoner](#) has a health-related discharge summary on their file when released from prison.

## Object Class attributes

### Identifying and definitional attributes

**Object class:** [Person](#)

**Definition:** A human being.

### Collection and usage attributes

**Comments:** Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are not exclusively male or female.

## Property attributes

### Identifying and definitional attributes

**Property:** [Prisoner health discharge summary indicator](#)

**Definition:** An indicator of whether a summary of the health-care provided is on the prisoner's medical file at the time of release from prison. The summary may contain information on the prisoner's medical history including current problems, allergies, scheduled appointments, any investigations (i.e. blood tests, current medications, vaccination record) and contact details for further information on the prisoner.

**Property group:** [Exit/leave from service event](#)
