# Person with cancer—performance status score at diagnosis, Eastern Cooperative Oncology Group code N

# Identifying and definitional attributes

Metadata item type: Data Element
Short name: ECOG score

**Synonymous names:** Zubrod score; WHO performance status score

METEOR identifier: 412327

**Registration status:** <u>Health</u>, Standard 08/05/2014

**Definition:** A score given at the time of diagnosis outlining the extent to which a person with

cancer's disease affects their daily living abilities, as represented by a code.

**Data Element Concept:** Person with cancer—performance status score at diagnosis

Value Domain: Eastern Cooperative Oncology Group performance status score code N

#### Value domain attributes

# Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

•	Value	Meaning
Permissible values:	0	Fully active, able to carry on all pre-disease performance without restriction.
	1	Restricted in physically strenuous activity but ambulatory and able to carry out work of a light or sedentary nature, e.g., light house work, office work.
	2	Ambulatory and capable of all selfcare but unable to carry out any work activities. Up and about more than 50% of waking hours.
	3	Capable of only limited selfcare, confined to bed or chair more than 50% of working hours.
	4	Completely disabled. Cannot carry on any selfcare. Totally confined to bed or chair.
Supplementary values:	8	Unknown

Oncology Group. Am J Clin Oncol 5:649-655

#### Data element attributes

### Collection and usage attributes

Guide for use: The Eastern Cooperative Oncology Group (ECOG) performance score was

developed to consistently assess the impact of a person's disease on their daily

living abilities.

Record the ECOG performance status score recorded at diagnosis and before the

implementation of treatment.

Performance status should be based on assessment by a clinician at the time of

initial presentation.

Only record performance status when expressed as an ECOG score by the clinician; do not attempt to determine the ECOG score from patient notes.

**Collection methods:** This information should be obtained from the patient's medical record at the time of

diagnosis. It may be available in the admission notes, outpatient notes or referral

letters.

Comments: Performance status at diagnosis is an important prognostic indicator and is used to

determine appropriate treatment, assess how the disease is progressing, and for

the statistical analyses of outcome adjusted by performance status.

Previous attempts to collect this information has revealed that ECOG scores are not routinely recorded at the time of diagnosis. However, performance status is an important prognostic indicator and used to determine and evaluate treatment decisions so recording the ECOG score in patient notes at the time of diagnosis is

strongly recommended.
