Non-school qualification cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	413211
Registration status:	Health , Superseded 28/04/2016
DSS type:	Data Element Cluster
Scope:	These data elements are used in conjunction with each other to determine whether a person has a non-school qualification and if so, the level of that qualification.

Collection and usage attributes

Guide for use: The Non-school qualification cluster comprises two data elements that determine a person's non-school-qualification.

This is achieved through the combination of the two data elements: *Person—non-school qualification indicator, yes/no/not stated/inadequately described code N* and *Person—level of highest non-school qualification, code N*.

The Non-school qualification cluster describes the following information:

Data element		
Non-school qualification indicator	Yes	No
Level of non-school qualification	Code N	N/A

N/A is not applicable.

Collection methods: Information on a prison entrant's non-school qualifications is collected as part of the reception assessment on the National Prisoner Health Census Prison Entrants form.
