Emergency department stay—ambulance offload delay, total minutes NNNNN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Emergency department ambulance offload delay time
Synonymous names:	Ambulance ramping time
METEOR identifier:	417543
Registration status:	Tasmanian Health , Standard 09/12/2016
Definition:	The amount of time, measured in minutes, between when ambulance crews have waited more than 15 minutes from triage time while having a patient under their care until the time the emergency department takes the responsibility for the care of the patient.
Context:	Ambulance offload delay occurs when an ambulance crew and patient arrive at the emergency department and the patient is required to wait and under the care of the ambulance crew for more than 15 minutes until the emergency department has the capacity to accept or treat the patient.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Emergency department stay—ambulance offload delay
METEOR identifier:	440535
Registration status:	Tasmanian Health , Standard 09/12/2016
Definition:	Ambulance offload delay occurs when a patient arrives at an emergency department and is triaged but remains under the care of an ambulance crew until the emergency department takes the responsibility for the care of the patient.
Context:	Emergency department care
Object class:	Emergency department stay
Property:	Ambulance offload delay

Value domain:	Total minutes NNNNN
METEOR identifier:	270602
Registration status:	Community Services (retired) , Standard 10/04/2013 Disability , Standard 13/08/2015 Health , Standard 01/03/2005 Independent Hospital Pricing Authority , Standard 01/11/2012 National Health Performance Authority (retired) , Retired 01/07/2016 Tasmanian Health , Standard 08/12/2016
Definition:	Total number of minutes.

Representational attributes

Representation class:	Total
------------------------------	-------

Data type:	Number
Format:	NNNNN
Maximum character length:	5
Unit of measure:	Minute (m)

Data element attributes

Collection and usage attributes

Guide for use: A patient is considered to have Ambulance Offload Delay (AOD) when they are still under the care of ambulance crew 15 minutes after their arrival to the emergency department. The amount of time spent AOD is set to zero at the 15 minutes mark, consequently a patient under the care of ambulance crew and located at the emergency department for 20 minutes would be considered to have an AOD of 5 minutes.

Collection methods: ([StaySegmentEndTime] - [ArrivalDateTime]) when > than 15 or 30 minutes* and the [LocationDescription] field is *Ambulance waiting*.

* an ambulance offload delay time of over 15 minutes being below 15:59 seconds and over 30 minutes being below 30:59 seconds.
