Accountability attributes

- Reporting requirements:** National Healthcare Agreement
- Organisation responsible for providing data:** Australian Institute of Health and Welfare
- Further data development / collection required:** Specification: Interim
- Other issues caveats:** Data limited to public hospitals in 2007-08 and 2008-09.

For detailed definitions see NHPC 2004 *National Report on Health Sector Performance Indicators 2003*.

Calculation of cost per casemix-adjusted separations for private hospitals would require information on recurrent expenditure and admitted patient cost proportion for individual private hospital establishments, and casemix-adjusted separations for private hospitals. Comparison across public and private sectors would require information on costs excluded from private hospital expenditure that are charged to the Medicare Benefits Schedule (MBS)/Pharmaceutical Benefits Scheme (PBS).
