Numerator excludes multiple procedures for the same separation within the same procedure group; separations with care type newborn with no qualified days, hospital boarders and posthumous organ procurement.

Rates directly age-standardised. Hysterectomy limited to patients aged 15–69 years. Prostatectomy limited to males.

Analysis by state and territory is based on location of service.

Analysis by remoteness and SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) is based on usual residence of person.

Presented number and per 1,000.

**Disaggregation:**

2008-09—Nationally, by SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) deciles

2008-09—State and territory, by procedure type (and total), by:

- hospital sector
- Indigenous status
- remoteness
- SEIFA IRSD quintiles.

Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication. National disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable.

**Comments:**

This provides an indication of the extent to which patients are being provided with particular interventions. It reflects the quality of non-hospital care, access to hospitalisation and access to interventions for those patients who are hospitalised.
