National Healthcare Agreement: PI 34-Waiting times for elective surgery, 2011

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Progress measure

Short name: PI 34-Waiting times for elective surgery, 2011

METEOR identifier: 421623

Registration status: Health, Superseded 31/10/2011

Description: Median and 90th percentile waiting times for elective surgery in public hospitals,

including by indicator procedure

Indicator set: National Healthcare Agreement (2011)

Health, Superseded 31/10/2011

Outcome area: Hospital and Related Care

Health, Standard 07/07/2010

National Health Performance Authority (retired), Retired 01/07/2016

Data quality statement: National Healthcare Agreement: PI 34: Waiting times for elective surgery, 2011 QS

Health, Superseded 04/12/2012

Collection and usage attributes

Computation description: Elective surgery as defined in the National Elective Surgery Waiting Times Data

Collection.

See Table 6.5 in Australian hospital statistics 2007—08 for a list of indicator

procedures.

Waiting times are calculated for patients whose reason for removal was Admitted

as an elective patient.

Includes the proportion of removals for elective admission that waited more than

365 days.

Analysis by state and territory based on location of service.

Analysis by remoteness and SEIFA Index of Relative Socioeconomic

Disadvantage (IRSD) is based on usual residence of person.

Presented as number of days.

Computation: The number of days waiting time is calculated by subtracting the listing date for

care from the removal date, minus any days when the patient was 'not ready for care', and also minus any days the patient was waiting with a less urgent clinical

urgency category than their clinical urgency category at removal.

Calculated overall and for each indicator procedure.

Numerator: Not applicable

Numerator data elements: Data Element / Data Set

Elective surgery waiting list episode—reason for removal from a waiting list,

code N

Disaggregation:

Denominator:

2008–09 and 2009–10—State and territory, by indicator procedure (and total) by:

- peer group
- Indigenous status

2008–09—State and territory by:

- remoteness
- SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) quintiles

2008-09-Nationally, by SEIFA IRSD deciles

Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication. National disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable.

Guide for use

Data source type: Administrative by-product data Used for disaggregation by remoteness and SEIFA IRSD

Comments: Indicator procedures are a subset of all procedures, e.g. in 2007–08,

approximately 65% of removals did not fall into one of the defined indicator

procedures.

Most recent data available for 2011 CRC: 2008-09 and 2009-10
