# National Healthcare Agreement: PI 23-Selected potentially avoidable GP-type presentations to emergency departments, 2011

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Progress measure
<b>Short name:</b>	PI 23-Selected potentially avoidable GP-type presentations to emergency departments, 2011
<b>METEOR identifier:</b>	421647
<b>Registration status:</b>	<a href="#">Health</a> , Superseded 31/10/2011
<b>Description:</b>	Attendances at public hospital emergency departments that could have potentially been avoided through the provision of appropriate non-hospital services in the community.
<b>Indicator set:</b>	<a href="#">National Healthcare Agreement (2011)</a> <a href="#">Health</a> , Superseded 31/10/2011
<b>Outcome area:</b>	<a href="#">Primary and Community Health</a> <a href="#">Health</a> , Standard 07/07/2010
<b>Data quality statement:</b>	<a href="#">National Healthcare Agreement: PI 23: Selected potentially avoidable GP-type presentations to emergency departments, 2011 QS</a> <a href="#">Health</a> , Superseded 04/12/2012

## Collection and usage attributes

<b>Computation description:</b>	<p>Potentially avoidable GP-type presentations are defined as presentations to public hospital emergency departments with a Type of visit of <i>Emergency presentation</i> (or for South Australia only, Type of visit can be <i>Emergency presentation or Not reported</i>) where the patient:</p> <ul style="list-style-type: none"><li>• was allocated a Triage category of 4 or 5 and</li><li>• did not arrive by ambulance or police or correctional vehicle and</li><li>• was not admitted to the hospital, not referred to another hospital, or did not die.</li></ul> <p>Limited to public hospitals in Peer Groups A and B.</p> <p>Analysis by state and territory, remoteness and SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) is based on usual residence of person.</p> <p>Presented as a number.</p>
<b>Computation:</b>	Numerator only.
<b>Numerator:</b>	Number of potentially avoidable GP-type presentations to emergency departments.
<b>Numerator data elements:</b>

Data source type: Administrative by-product data

**Disaggregation:**

2008-09 and 2009-10—Nationally by SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) deciles

2008-09 and 2009-10—State and territory, by:

- Indigenous status
- remoteness
- SEIFA IRSD quintiles
- peer group and triage category

Disaggregations within individual jurisdictions are subject to data quality considerations. Some disaggregations may result in numbers too small for publication. National disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable.

**Guide for use**

Data source type: Administrative by-product data

**Comments:** This definition of 'potentially avoidable GP-type presentation' was used in the Booz Allen Hamilton study of emergency department care in NSW, and is considered to be a reasonable starting approximation of the population that should be receiving service in the primary care sector.

Most recent data available for 2011 CRC report: 2008–09 and 2009-10.

## Representational attributes

**Representation class:** Count  
**Data type:** Real  
**Unit of measure:** Episode  
**Format:** NN[NNNNN]

## Indicator conceptual framework

**Framework and dimensions:** [Accessibility](#)

### Frequency

Annual

### Data custodian

Australian Institute of Health and Welfare

## Accountability attributes

**Reporting requirements:** National Healthcare Agreement

**Organisation responsible for providing data:** Australian Institute of Health and Welfare

**Benchmark:** [National Healthcare Agreement performance benchmark and National Partnership on Taking Pressure Off Public Hospitals performance benchmark:](#)

By 2012–13, 80 percent of emergency department presentations are seen within clinically recommended triage times as recommended by the Australian College of Emergency Medicine.

[National Partnership on Taking Pressure Off Public Hospitals performance benchmark:](#)

By 2013–14, 95 per cent of hospitals with an ED report to the non-admitted emergency care national minimum data set collection.

[National Partnership Agreement on Taking Pressure Off Public Hospitals output measures:](#)

Output: A nationally accepted definition of what a non emergency GP type presentation is based on emergency department DRGs by June 2012.

Joint Roles: D10 Commonwealth and States to develop a nationally consistent DRG based definition of a non emergency primary care presentation.

**Further data development / collection required:** Specification: Interim
