Medical indemnity claim management episode— Australian state/territory identifier

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	421970
Registration status:	Health , Standard 07/12/2011
Definition:	An identifier of the state or territory whose health authority is managing a medical indemnity claim.

Object Class attributes

Identifying and definitional attributes

Object class:	Medical indemnity claim management episode
Definition:	The management of a medical indemnity claim and recording the information relevant to that claim. Some main tasks in managing a medical indemnity claim include investigation of the allegations and facts related to the claim, engaging legal expertise, setting a reserve to cover costs arising from the claim and covering costs as they arise. Documentation of the conduct and outcomes of claim management produces the information relevant to the claim.
Specialisation of:	Service/care event
