Synonymous names: FIGO cancer staging system

METEOR identifier: 531364

Definition: The International Federation of Gynecology and Obstetrics cancer staging system

is an international system for coding gynaecological cancer, including cervical, endometrial, ovarian and vulval cancer. This system was developed by International Federation of Gynecology and Obstetrics (FIGO) in 1958, and most recently

updated in 2009.

The two purposes of this system are to allow for comparison of patient treatment and outcomes across both treatment centres and population groups, and to divide

patients into prognostic groups.
