Cancer treatment—treatment complication type, gynaecological cancer-related radiotherapy code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Radiotherapy treatment complication type
METEOR identifier:	424314
Registration status:	Health , Standard 08/05/2014
Definition:	The type (or types) of treatment complication occurring within 30 days of radiotherapy for women with gynaecological cancer, as represented by a code.
Context:	For monitoring side effects of radiotherapy in 30 days post-treatment.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Cancer treatment—treatment complication type
METEOR identifier:	425587
Registration status:	Health , Standard 08/05/2014
Definition:	The type of treatment complication (or complications) experienced by a person with cancer during their treatment for cancer and attributed to that treatment.
Object class:	Cancer treatment
Property:	Treatment complication type

Source and reference attributes

Submitting organisation:	Cancer Australia
--------------------------	------------------

Value domain attributes

Identifying and definitional attributes

Value domain:	Gynaecological cancer-related radiotherapy complication type code N
METEOR identifier:	424312
Registration status:	Health , Standard 08/05/2014
Definition:	A code set representing types of treatment complications occurring within 30 days of radiotherapy for women with gynaecological cancer.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Bowel obstruction requiring surgery
	2	Fistula requiring stoma formation

	3	Pelvic insufficiency
	8	Other
Supplementary values:	9	Not stated/inadequately described

Source and reference attributes

Submitting organisation: Cancer Australia
Reference documents: NBOCC Working Group, 2008

Data element attributes

Collection and usage attributes

Guide for use: Record the code for the type/s of [treatment complication](#)/s that occur within 30 days of the primary course of radiotherapy for gynaecological cancer.

This item can be recorded multiple times to account for multiple treatment complications.

Source and reference attributes

Submitting organisation: Cancer Australia
Reference documents: NBOCC Working Group, 2008

Relational attributes

Implementation in Data Set Specifications: [Gynaecological cancer \(clinical\) DSS](#)
[Health](#), Superseded 14/05/2015

Conditional obligation: This data element should be recorded when [Cancer treatment—gynaecological cancer post-radiotherapy complication indicator, yes/no/unknown code N](#) indicates the presence of a radiotherapy related treatment complication.

[Gynaecological cancer \(clinical\) NBPDS](#)
[Health](#), Standard 14/05/2015

Conditional obligation:

This data element should be recorded when [Cancer treatment—gynaecological cancer post-radiotherapy complication indicator, yes/no/unknown code N](#) indicates the presence of a radiotherapy related treatment complication.
