Cancer treatment—post-initial surgery residual tumour size

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 425579

Registration status: Health, Standard 08/05/2014

Definition: The size of the residual tumour remaining after the initial surgery for cancer

treatment.

Object Class attributes

Identifying and definitional attributes

Object class: Cancer treatment

Definition: The course of cancer-directed treatment or treatments, with defined dates of

commencement and cessation, given to the patient by a treatment provider or team

of providers.

This may include cancer-directed surgical treatment, radiation therapy and systemic agent therapy for cancer. It applies to the primary course of cancer treatment, treatment administered to the patient in response to disease progression or treatment administered to the patient in response to disease

recurrence.

Specialisation of: Service/care event
