## Comments:

Most recent data available for 2011 CRC report is:

- Main data collection: 2006 Census.
- Supplementary data collection: 2008 NATSISS (Indigenous) and 2008 Survey of Education and Work (SEW) (non-Indigenous).

The SEW does not include people living in very remote areas which may affect the comparability results.

The size of the standard errors mean that SEW data may not be adequate for measuring change over time.

The Indigenous undercount in the Census may introduce bias into the results for Indigenous disaggregation, which may affect comparability across states and territories.

Baseline year for this indicator is 2008; target year is 2020.
