Alt Text: Figure 3: Example search using new functionality

File Name: Figure 3.jpg

Image:

The screenshot displays the METEOR Search registry interface within a Windows Internet Explorer browser window. The URL is <http://meteor.aihw.gov.au/content/index.phtml/itemId/237518>. The page header includes the Australian Government logo and the Australian Institute of Health and Welfare. The main content area is titled "Search registry" and features a search bar with the text "area of usual residence" entered. Below the search bar, there are several filter sections: "Search for:" (with a "Search" button), "Return only matches on (optional)", "Metadata item type", "Registration authority", "Registration status", and "Registration status change date". The "Search for:" section has a red box around the search bar and a callout stating "Search words entered into the search box." The "Registration status" section has a red box around the "In last year" option and a callout stating "METeOR will only return metadata items that have had a registration change in the last year." The "Registration status change date" section has a red box around the "Between" date range selector and a callout stating "METeOR will search for the search words as a phrase in the title of all standard data elements."
