# Cancer treatment—multidisciplinary team review indicator

## Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 428238

Registration status: Health, Standard 08/05/2014

**Definition:** An indicator of whether a patient's cancer treatment is discussed and a treatment

plan developed at a multidisciplinary team meeting during the course of treatment

for cancer.

# **Object Class attributes**

#### Identifying and definitional attributes

Object class: <u>Cancer treatment</u>

**Definition:** The course of cancer-directed treatment or treatments, with defined dates of

commencement and cessation, given to the patient by a treatment provider or team

of providers.

This may include cancer-directed surgical treatment, radiation therapy and systemic agent therapy for cancer. It applies to the primary course of cancer treatment, treatment administered to the patient in response to disease progression or treatment administered to the patient in response to disease

recurrence.

Specialisation of: Service/care event

# Property attributes

### Identifying and definitional attributes

Property: Multidisciplinary team review indicator

**Definition:** An indicator of whether a patient's treatment was discussed and planned at a

multidisciplinary team meeting.

The multidisciplinary team should consist of the core disciplines required for the

provision of good patient care, which will vary by disease type.

Property group: Planning event
