Laboratory—result identifier, text X[X(39)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Laboratory result identifier
METEOR identifier:	428639
Registration status:	Health, Standard 15/11/2012
Definition:	Result identifier unique within a laboratory, as represented by text.
Data Element Concept:	Laboratory—result identifier
Value Domain:	Text X[X(39)]

Value domain attributes

Representational attributes

Representation class:	Text
Data type:	String
Format:	X[X(39)]
Maximum character length:	40

	Value	Meaning
Permissible values:		

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use:	The assignment of an identifier to a result allows the linking of a result to a request within the laboratory. The laboratory result identifier will be derived from the pathology report and will be unique within the laboratory only.

Source and reference attributes
