Reporting requirements: (b.2) SDAC for all data except Indigenous; NATSISS for Indigenous data.

Organisation responsible for providing data:

Australian Bureau of Statistics with input from AIHW on social and community

activities in scope.

Further data development / collection required:

Frequency of data source is listed on the NDIMG workplan for

discussion/consideration.

Other issues caveats: Available disaggregation depends on sampling errors and other caveats.

Reporting issues are the same as listed in performance indicator a.

SDAC data are collected every six years.

2009 SDAC does not provide this data for the Indigenous population,

therefore Indigenous data needs to be taken from a different source (e.g. NATSISS

2008).

The NATSISS uses the an abbreviated form of the Disability Module, which is less

detailed than the SDAC.

Social and community activities as defined in the NATSISS are more culturally

appropriate for Indigenous Australians than those in the SDAC.

Comparison data for the non-disabled population is only available for the first of

these performance indicators, from the General Social Survey 2006.
