National Disability Agreement: e(1)-Proportion of potential population expressing unmet demand for disability support services, 2011

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Proportion of potential population expressing unmet demand for disability support services, 2011
METEOR identifier:	428745
Registration status:	Community Services (retired) , Superseded 05/03/2012
Description:	Unmet demand for disability support services.
Indicator set:	National Disability Agreement (2011) Community Services (retired) , Superseded 05/03/2012
Outcome area:	People with disability enjoy choice, wellbeing and the opportunity to live as independently as possible Community Services (retired) , Standard 23/07/2010 Disability , Standard 13/08/2015

Collection and usage attributes

Population group age from:	0		
Population group age to:	64		
Computation description:	<p>Computation will be appropriate to the target population and corresponding available data, including jurisdiction demand data and SDAC enhancements. Multiple measures for this indicator give person and system level perspectives on unmet demand.</p> <p>Service system-identified unmet demand as a proportion of confirmed demand—computation based on confirmed demand measured at jurisdiction level (under Priority A deliverable 3, jurisdiction demand data are planned to be available from 2010). This measure is based on jurisdiction demand data.</p>		
Computation:	$\sum r_i / \sum n_i$		
Numerator:	Number of eligible persons aged 0–64 years waiting to commence service or waiting for additional service (from jurisdiction demand systems).		
Numerator data elements:	<table><tr><th>Data Element / Data Set</th></tr><tr><td>Data Source Jurisdiction demand systems</td></tr></table>	Data Element / Data Set	Data Source Jurisdiction demand systems
Data Element / Data Set			
Data Source Jurisdiction demand systems			
Denominator:	Number of persons aged 0–64 years who require and are eligible for disability support services, including persons receiving and not receiving services (from jurisdiction demand systems).		
Denominator data elements:	<table><tr><th>Data Element / Data Set</th></tr><tr><td>Data Source Jurisdiction demand systems</td></tr></table>	Data Element / Data Set	Data Source Jurisdiction demand systems

Accountability attributes

Organisation responsible for providing data: Australian Institute of Health and Welfare.

Accountability: Overall—shared; employment services—AG; Accommodation, respite, community support (includes management and individual service planning), community access services—state and territory governments.

Benchmark: Related NDA benchmark - Performance benchmark (b) A decrease in the proportion of potential population with unmet demand for services.

Further data development / collection required: Indicator e(1) is intended to give a service system identified measure of unmet demand as a proportion of confirmed demand. Definitional work to inform data development for Indicator e(1) is proceeding under NDA Priority A Deliverable 3. This indicator will be based on jurisdictional demand data, which will need to be comparable with regards to definitions, items and computation methods.

Other issues caveats: Available disaggregation depends on sampling errors and other caveats.
