<b>Supplementary values:</b>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>UNK</td><td>Not stated/Unknown</td></tr></tbody></table>	Value	Meaning	UNK	Not stated/Unknown
Value	Meaning				
UNK	Not stated/Unknown				

### Collection and usage attributes

**Guide for use:**

CODE OFF Official address

This code indicates that the address and its component parts have been formally assigned by the responsible state jurisdiction/s.

CODE VAL Valid alias address

This code indicates that the address is an acceptable alias to the official address by the responsible state jurisdiction/s.

CODE INV Invalid alias address

This code indicates a non-official address, for example, a vanity address where a perceived up-market locality name is incorrectly used in place of the officially assigned locality name.

CODE OBS Obsolete address

An address that is no longer valid, for example, where there is a change of street name, change of locality or where a RMB address previously used has been replaced by Rural Numbering.

CODE UNK Not stated/unknown

Where the Address Status is not stated or unknown a null entry will be recorded.

***DSS specific information:***

This data element is used to help gain information about the way in which an address is able to be recognised by official systems, including postal delivery or attendance at the geographical address.

This data element may be collected if address validity information is required. If collected, it should have an associated [Address—address start date, DDMMYYYY](#) and an optional [Address—address end date, DDMMYYYY](#). Note that only one address validity value can exist for a given address.
