Address—unstructured address line, text X[X(49)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Unstructured address line
Synonymous names:	Overseas address line
METEOR identifier:	430158
Registration status:	Community Services (retired) , Standard 06/02/2012 Disability , Standard 13/08/2015 Housing assistance , Standard 01/05/2013
Definition:	A description of an address, written in an unstructured address line format, as represented by text.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Address—unstructured address line
METEOR identifier:	430156
Registration status:	Community Services (retired) , Standard 06/02/2012 Disability , Standard 13/08/2015 Housing assistance , Standard 02/05/2013 WA Health , Standard 19/03/2015
Definition:	A description of an address, written in an unstructured address line format.
Object class:	Address
Property:	Unstructured address line

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
Origin:	Standards Australia 2006. AS 4590—2006 Interchange of client information. Sydney: Standards Australia.

Value domain attributes

Identifying and definitional attributes

Value domain:	Text X[X(49)]
METEOR identifier:	430017
Registration status:	Aged Care , Standard 30/06/2023 Community Services (retired) , Standard 06/02/2012 Disability , Standard 13/08/2015 Health , Standard 07/12/2011 Housing assistance , Standard 01/05/2013 Indigenous , Standard 13/03/2015 Tasmanian Health , Standard 09/12/2016 WA Health , Standard 06/03/2014
Definition:	A combination of alphanumeric characters.

Representational attributes

Representation class:	Text
------------------------------	------

Data type: String
Format: X[X(49)]
Maximum character length: 50

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: Where there is a need to transfer an Australian address that does not conform with the commonly used address format, the unstructured address lines may be used. These data elements should not be used except when it is impossible to use the other more structured address data elements.

Example

Cabin 44 Block 7 (Unstructured Address Line 1)
HMAS Watson (Unstructured Address Line 2)
Watsons Bay Wharf (Unstructured Address Line 3)
WATSONS BAY NSW 2030 (Unstructured Address Line 4)

Overseas addresses have many formats. To accommodate this the use of unstructured lines of detail are used. While 4 lines have been provided for overseas address details, not all lines need to be used.

Overseas addresses may follow different formats to that of Australian addresses. Common differences are:

- Street name preceding street number
- Postcode format
- Postcode preceding locality name

Example:

32, Kasumigaseki 1 Chome (Overseas Address Line 1)
Chiyoda-ku (Overseas Address Line 2)
TOKYO 100-90 (Overseas Address Line 3)
JAPAN (Country name. Note: for client data interchange this standard uses the country code)

Collection methods: Unstructured address may be repeated up to 4 lines.

While 4 lines have been provided for unstructured Australian address details, not all lines need to be used.

Where there is an overseas address the country name code becomes mandatory.

Unstructured address lines, when used, should contain the entire address.
