Value domain attributes

Representational attributes

| | |
|----------------------------------|-------------|
| Representation class: | Total |
| Data type: | Number |
| Format: | N[NNNN].NNN |
| Maximum character length: | 8 |

Data element attributes

Collection and usage attributes

| | |
|-----------------------|--|
| Guide for use: | Usage Example: 1023.378 |
| Comments: | This is considered an optional data element, but with the increased amount of high-density population and the emergence of three-dimension modelling and geographic information systems, an accurate height for an address will be increasingly in demand. |

Source and reference attributes

| | |
|---------------------------------|--|
| Submitting organisation: | Australian Institute of Health and Welfare |
| Origin: | Standards Australia 2006. AS 4590—2006 Interchange of client information. Sydney: Standards Australia. |
