<b>Description:</b>	<p>NOTE: THIS PERFORMANCE INDICATOR HAS BEEN SUPERSEDED BY ITS EQUIVALENT FOR 2013, WITHOUT BEING MADE A STANDARD.</p> <p>Proportion of Indigenous babies born within the previous 12 months whose birth weight has been recorded at the primary health care service.</p>
<b>Rationale:</b>	<p>Low birth weight (newborn babies weighing less than 2,500 grams) is associated with an increased risk of ill health and is related to a higher mortality within the first year of life. Low birth weight is a particular issue for Indigenous Australians. Recording birth weight encourages the provision of appropriate care to limit the negative associations of low birth weight.</p>
