

# Person details data dictionary

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Set Specification
<b>METEOR identifier:</b>	430772
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Community Services (retired)</a>, Standard 06/02/2012</li><li>• <a href="#">Disability</a>, Standard 13/08/2015</li></ul>
<b>DSS type:</b>	Data Set Specification (DSS)
<b>Scope:</b>	<p>The person details data dictionary contains the data elements to identify the name and demographic characteristics of a person defined as a human being, whether man, woman or child. It is based on the Standards prepared by Standards Australia Subcommittee IT-027-01, Personal and Corporate Data-Representation and Management, for Committee IT-027, Data Management and Interchange to supersede AS 4590-1999.</p> <p>The revised AS 4590—2006 Interchange of client information standard is a result of industry concern at the numerous data interchange formats used within the information technology industry. The objective of the Standard is to provide industry with a common client data interchange standard.</p> <p>Wherever possible, the definitions of data elements are based on existing standards.</p> <p>Reference has been made to International and Australian Standards, and to standards from the Australian Bureau of Statistics.</p>

## Collection and usage attributes

<b>Guide for use:</b>	<p>The Person details data dictionary is one of a suite of data dictionaries based on the AS 4590—2006 Interchange of client information standard. This suite of data dictionaries is not limited to a specific data collection. The aim is to enable data developers to select appropriate data elements to use in meeting the needs of their specific data collection. These data dictionaries are:</p> <ul style="list-style-type: none"><li>• Party identifier details data dictionary</li><li>• Electronic contact details data dictionary</li><li>• Organisation details data dictionary</li><li>• Address details data dictionary</li></ul>
-----------------------	--

A table has been created to show the mapping between the data elements within the Person details data dictionary and the AS 4590—2006 Interchange of client information standard. See: [Person details mapping](#)
