Indigenous primary health care: PI03a-Number of regular clients who received an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715), 2012

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI03a-Number of regular clients who received an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715), 2012
METEOR identifier:	431773
Registration status:	Health , Superseded 23/02/2012
Description:	<p>NOTE: THIS PERFORMANCE INDICATOR HAS BEEN SUPERSEDED BY ITS EQUIVALENT FOR 2013, WITHOUT BEING MADE A STANDARD.</p> <p>Number of regular clients who are Indigenous, aged 0-4 years and who have received a Medicare Benefits Schedule (MBS) Health Assessment for Aboriginal and Torres Strait Islander People within the previous 12 months AND number of regular clients who are Indigenous, aged 25 years and over and who have received an MBS Health Assessment for Aboriginal and Torres Strait Islander People within the previous 24 months.</p>
Rationale:	<p>The role of primary health care providers in early detection has been reinforced in recent years through the introduction of additional items under the MBS to encourage regular health assessments for all Aboriginal and Torres Strait Islander people. Regular health assessments encourage early detection, diagnosis and intervention for common and treatable conditions that cause morbidity and early mortality.</p>
Indicator set:	Indigenous primary health care key performance indicators (2012) Health , Superseded 23/02/2012

Collection and usage attributes

Population group age from:	0-4 years
	25 years and over

Computation description: Count of regular clients who are Indigenous, aged 0-4 years and who have received an MBS Health Assessment for Aboriginal and Torres Strait Islander People within the previous 12 months AND count of regular clients who are Indigenous, aged 25 years and over and who have received a Medicare Benefits Schedule (MBS) Health Assessment for Aboriginal and Torres Strait Islander People within the previous 24 months.

'Regular client' refers to a client of an OATSIH-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2 years.

MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715): A health assessment specifically available to all people of Aboriginal and Torres Strait Islander descent which can be used for health assessments across the age spectrum. The health assessment includes the assessment of a patient's physical health, and psychological and social well-being. It also assesses whether preventive health care and education should be offered to the patient, to improve that patient's health and well-being (Department of Health and Ageing 2011).

Presented as a number.

Calculated separately for regular clients aged 0-4 years and 25 years and older.

Computation: Numerator only

Numerator: Calculation A: Number of regular clients who are Indigenous, aged 0-4 years and who have received an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) within the previous 12 months.

Calculation B: Number of regular clients who are Indigenous, aged 25 years and over and who have received an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) within the previous 24 months.
