Definition: The status of an organisation's trading activity at a point in time.

Object Class attributes

Identifying and definitional attributes

Object class: [Organisation](#)
Definition: The smallest type of accounting unit within a management unit within a State or Territory of Australia which controls its productive activities and for which a specified range of detailed data is available, at least on an annual basis, thus enabling measures such as value added to be calculated.

Source and reference attributes

Reference documents: Australian Bureau of Statistics 2002. Standard Economic Sector Classifications of Australia (SESCA). ABS cat. no. 1218.0. Canberra: ABS.

Property attributes

Identifying and definitional attributes

Property: [Trading activity status](#)
Definition: A descriptor of the status of the activities that an entity engages in, in the course of carrying on its business, at a point in time. Trading is not limited to buying or selling goods, and trading activities are not necessarily profit-making or profit motivated activities.
Property group: [Organisational characteristics](#)

Source and reference attributes
