Indigenous primary health care: PI07a-Number of regular clients with a chronic disease who have received a GP Management Plan (MBS Item 721), 2012

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI07a-Number of regular clients with a chronic disease who have received a GP Management Plan (MBS Item 721), 2012
METEOR identifier:	432543
Registration status:	Health , Superseded 23/02/2012
Description:	<p>NOTE: THIS PERFORMANCE INDICATOR HAS BEEN SUPERSEDED BY ITS EQUIVALENT FOR 2013, WITHOUT BEING MADE A STANDARD.</p> <p>Number of regular clients who are Indigenous, have a chronic disease and who have received a GP Management Plan (MBS Item 721) within the previous 24 months.</p>
Rationale:	Effective management of chronic disease can delay the progression of disease, decrease the need for high-cost interventions, improve quality of life, and increase life expectancy. The development of a GP Management Plan is one way in which the client and primary health care provider can ensure appropriate care is coordinated.
Indicator set:	Indigenous primary health care key performance indicators (2012) Health , Superseded 23/02/2012

Collection and usage attributes

Computation description: Count of regular clients who are Indigenous, have a chronic disease and who have received a GP Management Plan (MBS Item 721) within the previous 24 months.

'Regular client' refers to a client of an OATSIH-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2 years.

GP Management Plan (MBS Item 721): The Chronic Disease Management (CDM) Medicare items on the Medicare Benefits Schedule (MBS) enable GPs to plan and coordinate the health care of patients with chronic or terminal medical conditions (Department of Health and Ageing 2011). GP Management Plans, for the purpose of this indicator, are defined in the MBS (Item 721).

Presented as a number.

Calculated separately for each chronic disease type:

A) Type II diabetes

Exclude Type I diabetes, secondary diabetes, gestational diabetes mellitus (GDM), previous GDM, impaired fasting glucose, impaired glucose tolerance.

B) Cardiovascular disease

C) Chronic obstructive pulmonary disease

D) Chronic kidney disease

At this stage, this indicator is only calculated for **Type II diabetes** as currently this is the only relevant chronic disease type with an agreed national definition.

Computation: Numerator only

Numerator: Calculation A: Number of regular clients who are Indigenous, have Type II diabetes and who have received a GP Management Plan (MBS Item 721) within the previous 24 months.

Numerator data elements:

Data Element / Data Set

[Person—diabetes mellitus status, code NN](#)

Data Source

[Indigenous primary health care data collection](#)
