children at the service.

Data Element Concept: Service provider organisation—number of Indigenous children enrolled in a

preschool program

Value Domain: <u>Total number N[NNNN]</u>

Value domain attributes

Representational attributes

Representation class: Total

Data type: Number

Format: N[NNNN]

Maximum character length: 5

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: The child must have been offered a place in a preschool program and actively

attending to be counted. A child is considered to be actively attending if they have attended a preschool program for at least one hour in the reference period or was absent in the reference period due to illness or extended holiday leave but was

expected to return.

Collection methods: The number of Indigenous children enrolled in a preschool program should be

collected for each preschool program available at the service. These data should

then be aggregated to the service provider level for reporting purposes.

Each child should be counted only once.

Enrolments in a preschool program should be reported for the specified reference

period.

Jurisdictions which adopt a two week reference period are required to derive their

data to a representative reference week.
