National Healthcare Agreement: PI 13-Proportion of children with 4th year developmental health check, 2012

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI 13-Proportion of children with 4th year developmental health check, 2012
METEOR identifier:	441359
Registration status:	Health , Retired 25/06/2013
Description:	Proportion of children who have received a 4 year old developmental health check.
Indicator set:	National Healthcare Agreement (2012) Health , Superseded 25/06/2013
Outcome area:	Prevention Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: PI 13-Proportion of children with 4th year developmental health check, 2012 QS Health , Retired 14/01/2015

Collection and usage attributes

Population group age from:	3 years
Population group age to:	5 years
Computation description:	<p>In extracting data for the items in question only services involving patients who were 3, 4 or 5 years of age at the time of service will be tabulated.</p> <p>Count children who receive both a health assessment and an Aboriginal and Torres Strait Islander people health assessment once only. Count children who have received more than one check (of either type) once only.</p> <p>Brief, standard, long and prolonged health assessments are claimed under MBS Items 701, 703, 705, 707 respectively.</p> <p>A health assessment provided by a practice nurse or registered Aboriginal health worker is claimed under MBS Item 10986</p> <p>Health assessments involving Aboriginal and Torres Strait Islander peoples may be claimed under MBS Item 715.</p> <p>Analysis by state/territory, remoteness and SEIFA Indicator of Relative Socio-economic Disadvantage (IRSD) is based on the postcode of residence of person as recorded by Medicare Australia at the date their last service was received in the reference period.</p> <p>Presented as a percentage.</p>
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Number of children aged 3, 4 or 5 years who have received a developmental health check (Healthy Kids Check) or a health assessment for Aboriginal and Torres Strait Islander people.

Numerator data elements:

Data Element / Data Set

Data Element

Instances of children receiving a Healthy Kids Check or an Aboriginal and Torres Strait Islander Child Health Check

Guide for use

Data source type: Census-based plus administrative by-product data

Disaggregation:

2010–11—Nationally, by SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) deciles

2010–11—State and territory, by:

- type of check (proxy for Indigenous status)
- remoteness (Australian Standard Geographical Classification Remoteness Structure)
- SEIFA IRSD quintiles

Some disaggregation may result in numbers too small for publication.

Disaggregation data elements:

Data Element / Data Set

Data Element

Healthy Kids Check (MBS item 709 or 711) or an Aboriginal and Torres Strait Islander Child Health Check (MBS item 708)

Guide for use

Data source type: Administrative by-product data

Used for disaggregation by state/territory, remoteness and SEIFA IRSD

Comments:

Most recent data available for 2012 CRC report: 2010–11

Data for MBS Items 701, 703, 705 and 707 include Indigenous children who receive these health assessments. It is therefore not possible to produce an Indigenous disaggregation.

MBS item numbers change over time. Extracted data may include historical item numbers that are no longer part of the MBS but have been processed by Medicare Australia within the reference period.

Indigenous Experimental Population Projections are available by 5 year age group, not by single year of age. Estimates for Indigenous children aged 4 years old are used.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Accountability attributes

Reporting requirements: National Healthcare Agreement

Organisation responsible for providing data: Department of Health and Ageing; Australian Institute of Health and Welfare to provide Data Quality Statement

Further data development / collection required: Specification: Interim—the MBS items do not cover all developmental health check activity, including that conducted through state and territory early childhood health assessments in preschools and community health centres.
